

Roger Flataker

Roger has an engineering and management education from NTNU. He focuses on the systems being connected to the organizational processes through good business architecture and anchoring with management and end users. Roger is a good communicator and translates customer needs into good solutions. He has the ability to dive deep into technical issues and at the same time focus on business value. He has particularly high competence in the introduction and use of collaboration tools in organizations. In addition, he has extensive experience in managing development projects. Roger also assists organizations in strategy development and change management. Roger also gives guest lectures at the Master of Management at NTNU in the subject "Interaction, social networks and new media". Roger has experience from many different industries that come in handy in the job as a team leader and chief consultant.
