

# Jardar Hollås

## Consultant

As a recent graduate with a bachelor's degree in digital infrastructure and cyber security from NTNU, Jardar is eager to bring his skills and knowledge to organizations looking to improve their digital infrastructure. With a background in cloud technology and digital architecture, and a specific focus on cyber security, he has built up a strong foundation in this field.

Jardar has practical experience of working with a number of tools that are essential for many modern work environments, such as Git and Azure DevOps. He has acquired practical experience with technologies such as Docker, Azure, Terraform and Helm through several projects. These work processes have given him good experience with programming and scripting languages such as PowerShell/bash, C/C++, Python, SQL and .Net Blazor.

Jardar is ready to start his career as a consultant in a field he is passionate about. His education and experience have prepared him well for this, and he is confident that he can be a valuable resource in the projects he is assigned to. He looks forward to working with a team of experienced professionals so that he himself can continue to learn and grow in this field.
